Desired Position

Frontend Architect

Summary

After graduating as a Computer Engineer and a Navy Ensign upon completing Naval High School and Naval Academy respectively, I served 6.5 years on various assignments as a Turkish Navy Officer under command of NATO and UN as well. After studying master, I shifted my career into research, design, and development of UX & Frontend, whilst literally retiring from Army. Apart from being a full-time developer, I'm training a class of 15 people on Frontend Development. Besides being happy to be involved in any phases amongst product to IT infrastructure, I feel much more confident when I focus on architectural Frontend and cognitive experience behind it in regard to assure end-to-end service quality.

Work Experience

- Bilişim Education Center		Sep 2021 - Mar 2022	**Software Trainer**

Jan 2020 - Current   **Senior Frontend Developer**

- Testimonial Tree (Remote)		Jun 2021 - Current
